Experience

Marketing Assistant Mar 2024 – Present
Tatras Contracting Group – Vancouver, BC (Remote)
· Supported SEO strategy with SEMrush-driven keyword and topic cluster research to guide blog content creation, contributing to a 200% increase in active users and new users in the past month.
· Created 4 newsletters in MailChimp, earning an avg. open rate of 35% and click-through rate of 11% from 800+ subscribers.
· Developed and scheduled weekly social media posts on LinkedIn, Instagram, and Facebook, earning 18k views and 300+ interactions on Facebook/Instagram, and 80k impressions and 2k reactions on Linkedin in the last year.

Website Project Manager & Marketing Coordinator Aug 2022 – Feb 2025
Canadian Polish Business Association – Mississauga, ON
· Led development of a revenue-generating membership website, acting as liaison between stakeholders and developers. Defined features, reported bugs, proposed UX improvements, and wrote website copy: earning 45 paid members and 197 newsletter subscribers in the first month post-launch.
· Managed social channels and introduced a social media strategy that tripled our LinkedIn following from 1000 to 3000+.
· Promoted 15 in-person networking events through social media, email & Eventbrite; selling over 1400 tickets.
· Developed and presented an international business plan approved by the Trade Commissioner Service (TCS) for the 2024 Sustainable Cities Trade & Investment Mission: Poland & Ukraine.

Programme Book Designer & Graphic Designer Nov 2022 – Dec 2025 (Seasonal)
Ekran Toronto Polish Film Festival – Toronto, ON
· Led the design of festival booklets for 2022-2024, providing 2,000+ attendees each year with a useful programming guide.
· Designed graphics for the 2024 social media campaign, reaching a combined audience of 3.8k on Instagram and Facebook.

Projects

Super Spy Cam – Full-Stack Motion Detection App
github.com/erinhollett/super-spy-cam
· Built a full-stack Python application to record motion outside an apartment door and send notifications via the Discord API.
· Used OpenCV to detect motion from a webcam mounted to a door eye-hole, record video, and save the clips locally.
· Built a RESTful API and simple frontend website using HTML and JavaScript to browse and search recorded footage.
